Opioid Epidemic

Drivers of Success

Business Case for Interoperability

New payment models and Federal policy demands interoperability for success.

Common Standards

Use of federally recognized, national standards.

Culture Change Around Access to Information

Individuals and clinicians ask for – and receive – usable electronic health information as a matter of course.

HIPAA

**Health Insurance Portability
and Accountability Act**

Video 2 - Your Health Information, Your Rights

SEND YOUR HEALTH INFORMATION TO A THIRD PARTY

You hold the key to your health information and can send or have it sent to anyone you want. Only send your health information to someone you trust.

Your provider is no longer responsible for the security of your health information after it is sent to a third party.

Be careful when sending your health information to a mobile application or other third party.

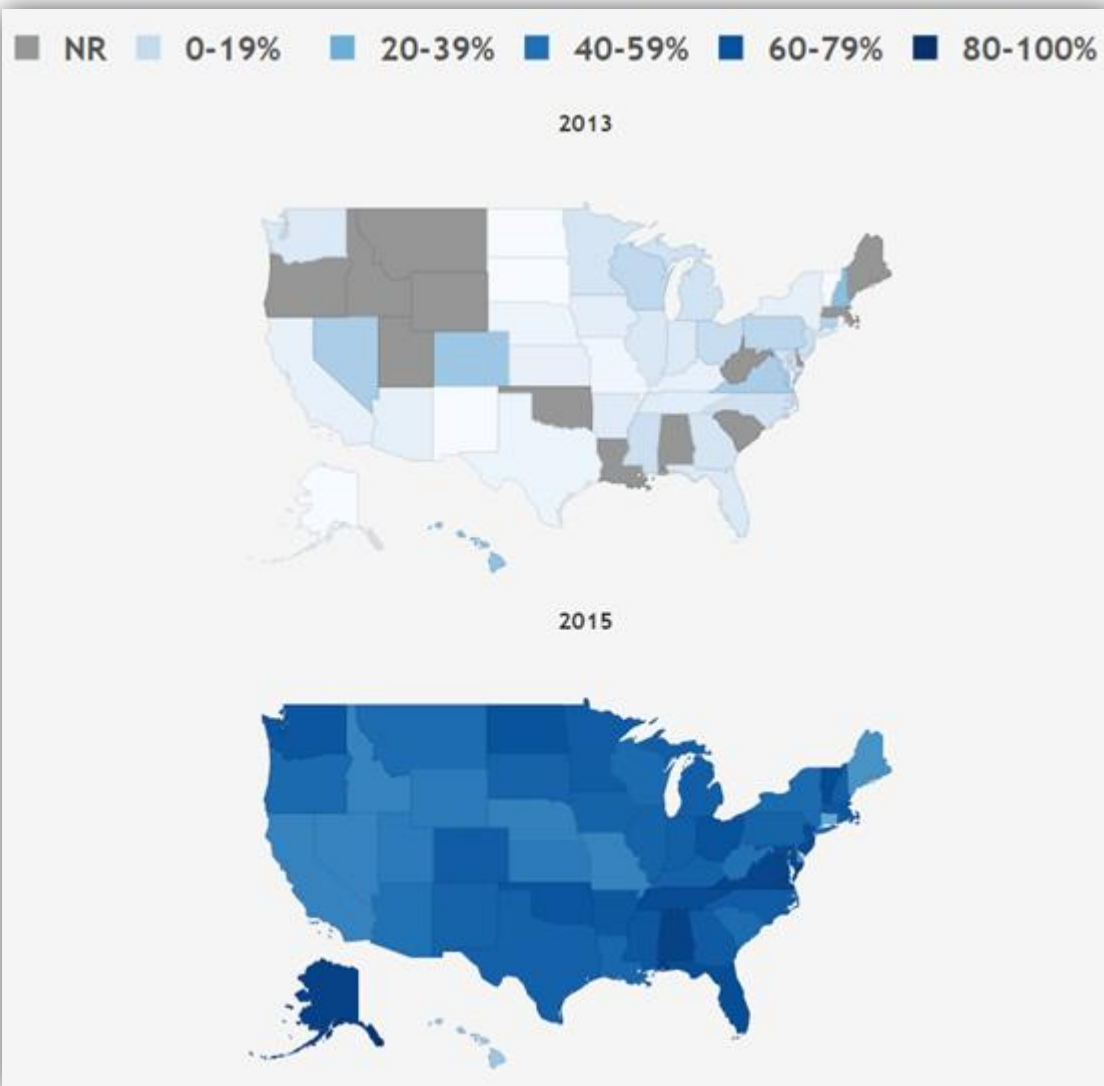

Once you have a copy of your health information, it is important to keep it protected.

Passwords can protect your health information on your computer or mobile device.
